Setting the Stage for a New Century

China, celebrating its 50th year since foundation, continues to grow at an exceptional rate. Its unending social and economic expansion have led to many challenges in industry, such as environment, communications and wellness, where technology is now a key factor to success. This is where Mitsubishi Electric is involved, responding to diversified customer needs at all levels of society. Integrating the latest in advanced technologies, we've created a synergy that enables us to provide optimal

solutions and full customer satisfaction, as evidenced by the results of projects of significance around the world. Applying this unique synergy, Mitsubishi Electric is now challenging the needs of the future, setting the stage for a new century in which "the dreams of all peoples can be realized." It is within this framework that we wish to join in partnership with you to create a more comfortable, safer environment in the daily lives of the people of China.
